

## **Day Before Procedure**

Once your procedure has been scheduled through your physician's office, please review the packet of information you received. Complete the registration and the health history forms. Take these forms with you to the Surgery Center on the day of your procedure. If there is a change in your physical condition, like a cold, fever or illness, notify your physician before coming to the Surgery Center.

### **Some tips to remember:**

- You will be called by the Surgery Center the day before your scheduled procedure to be given your arrival time. This time may differ from the time given to you by your physician's office, due to schedule changes.
- Arrange for responsible adult to drive you to and from the Surgery Center.
- If you wear glasses or contacts, be sure to bring along the protective cases for them.
- Bring any pertinent insurance information and cards with you. This includes Medicare.

### **Please:**

No food, drink or water after midnight. You may brush your teeth while taking care not to swallow any water. Remember to follow your pre-operative instructions. Failure to follow these instructions may result in the cancellation of your procedure.
